

REINVENTING SAVINGS IN CRYPTO

Supports 4 major crypto coins:
BTC, BCC, ETH, IXT (IX Token).

About

IX Wallet is an innovation among cryptocurrency wallets. This product allows you to earn profits by simply storing funds in the wallet. Main idea behind IX Wallet is to reinvent traditional saving system by utilizing modern technological advances and generate a distinctive passive income stream.

Simply said, IX Wallet is your new wallet for cryptocurrencies with zero commissions for deposits/withdrawals. Wallet features a multi-cluster blockchain system architecture to ensure complete security and transparency of transactions.

About IX

Main principle is straightforward:

Deposit money to account – generate passive income. This is called “profit sharing” concept and we offer **9 to 20.5% monthly interest** depending on HOLD Balance category. However, it’s not the only way to turn profits.

IX Wallet is brought to you by the Management and Development Team behind such projects as Stratis ICO, Binance and BNCEX, a team of individuals well experienced to create a real secure Decentralized Bank

IX ARBITER ROBOT

Currently our company is funded by the money earned from our operating project.

Our R&D department have created unique product, a trading bot featuring arbitrary functionality. His main task is to deliver profitable arbitrage deals by scanning stock exchange data and commencing trades (Buying lower price assets at company's A exchange, then selling assets for higher price at company's B exchange).

One of main IX Arbiter's advantages lies deep within it's core design: our bot is built upon a wide neural network and capable of learning and self-improving. IX TEAM keeps source code encapsulated, thus giving investors ability to earn profits with Arbiter via IX Wallet.

Arbiter is a fully automated entity and our work is focused on enhancing it's trade effectiveness by uploading vast amounts of trading statistics to neural centre. Daily returns depend on current volatility at markets, with average at 4-5% profits.

However, this number is a median as numbers tend to change depending on market volatility.

Our intentions with this revolutionary product are to make source code open to public after the main line of IX Ecosystem products is released. This will happen September 2020 and from that point we'll be willing to sell licensed copies to customers for personal use.

HOLD Balance accruals will be available only until September 2020

Then, all funds from there will be returned to your main balance

IXT Token

Our IX WALLET is strongly dependent on IXT, an **ERC20** standard cryptocurrency token. Total amount of tokens issued is **10 000 000**, with price tag starting at **\$1**.

To prevent speculative actions, IXT will not be available at crypto exchanges. This way, IXT price can be regulated by supply and demand market principles fairly, making for another income stream.

Whenever an IXT is sold, it's burnt out and is not a subject for restoration.

We are concerned that IXT price will grow up to 100\$ subsequently as we launch IX ECOSYSTEM products.

Earn Interest Monthly

IX Token Team strives to deliver exceptional and profitable opportunities to satisfy every client. We offer 4 categories for each currency with various monthly interest rates and daily accruals to your balance:

Category	Daily Accruals	Monthly Interest	Bitcoin	Bitcoin Cash	Ethereum
1	0.3%	9%	0.015 – 0.1 BTC	0.25 – 1.75 BCC	0.5 – 3 ETH
2	0.4%	12%	0.1 – 0.5 BTC	1.75 – 8.5 BCC	3 – 15 ETH
3	0.5%	15%	0.5 – 1.85 BTC	8.5 – 33.5 BCC	15 – 60 ETH
4	0.6%	18%	from 1.85 BTC	from 33.5 BCC	from 60 ETH

Fees & Commissions

Receiving
to account balance

0%

0%

Withdrawal
from account balance

1%

Withdrawal from HOLD balance
that remained in system for over 30 days

5%

Withdrawal from HOLD balance
within 16-30 days since deposit

Withdrawal from HOLD balance
within 1-15 days since deposit

10%

Special Offering:

+1%

If your HOLD balance remains
on balance untouched for 30 days
you get a monthly accrued bonus

+2.5%

If your HOLD balance remains
on balance untouched for 60 days
you get a monthly accrued bonus

You'll be able to acquire bonus on monthly basis(90, 120, 150... days) if no funds from HOLD balance are withdrawn

IXT Bounty Campaign

By participating in IXT Official Bounty Program you can get rewards for constructing your own members network.

Bounty Campaign consists of 5 ranks

Rank	Line 1	Lines from 2 to 10	Lines from 11
I			0% of daily accruals from all your referrals starting from 11 line
II			6% of daily accruals from all your referrals starting from 11 line
III	100% Of daily accruals from your 1 line referrals	10% Of daily accruals from your 2-10 line referrals	10% of daily accruals from all your referrals starting from 11 line
IV			14% of daily accruals from all your referrals starting from 11 line
V			18% of daily accruals from all your referrals starting from 11 line

For Lines 11 and up an accrual compensation is applicable

Example: You've achieved V Rank, therefore **you get 18%** of daily accruals from lines 11 and further.

However, your additional reward will be a compensation between your rank and partners rank.

If there exists a partner of III Rank, you'll get (18%-10%=8%) of his daily accruals as a bonus.

Conditions to open more Lines:

Access to new lines is granted when your partners achieve I Rank.

Each such partner invited gives you access to 2 additional passive income lines, up to the 10-th line.

Conditions to achieve higher ranks

Rank I	Minimal HOLD Balance of 1 ETH / 0.03 BTC / 0.5 BCC
Rank II	Summary of Team's HOLD Balance equivalent to \$125000
Rank III	Summary of Team's HOLD Balance equivalent to \$250000
Rank IV	Two III Rank Partners in Lines 1-2
Rank V	Two IV Rank Partners in Lines 1-2

Roadmap

Driven by a vision to provide convenient solutions to our customers, this Roadmap includes IX Company's plans for further development:

July 2019

Mobile App Launch

Development of user-friendly Android/iOS applications will allow you to send and receive funds, check your account balance from your smartphone.

Application is designed to maintain high standards of security: biometrical check, two-factor authentication when signing in.

Aug 2019

Internal Crypto Exchange Platform

Our plans considering IX Ecosystem include an internal exchange for most accepted crypto currencies. A crucial step in our development, as we can stop being dependent on third-party platforms and provide lower transaction fees with enhanced security and automated exchanges.

Sep 2019

Crypto Terminal Network

Our systems expansion outside of the Internet starts with a convenient network of instant exchange cash-2-crypto terminals. Best offer rate and enhanced operating speed are guaranteed by our partnership exchanges.

This way, incoming operation is seen almost momentarily after customers confirmation.

Oct 2019

Hardware Crypto Wallet

The most secure way to store your assets is an offline secure storage device that protects private keys from your assets. Built with advanced secure element inside, a chip designed to securely host confidential data and withstand crypto-attacks, our IX Storage provides an easy and efficient way to secure your funds.

You can manage IX account access privileges using Storage, this way intruders won't be able to use your data, even if they have all your credentials in possession.

4QT 2019

Crypto assets management through bank accounts worldwide

Our ambitions go beyond simply becoming a crypto wallet, thus we need to ensure use of the most convenient components of current banking system. IX Wallet is soon to be implemented into the network to provide high quality of service.

1QT 2020

Decentralized global payment system

Efficient business model, transparent blockchain technology and customer-oriented management is what makes our company such a powerful force to establish new digital economy. We strive to deliver unification to banking sector, thus our platform is designed to allow online shops and websites accept crypto and banking payments using IX Merchant Account.

2QT 2020

Launching of global Car Sharing service

Economical model of service would be deeply bounded with cryptocurrency, especially IX Token. IX Drive application would be connected with your wallet, and payment for Car Sharing service could be processed automatically from your cryptocurrency balance.

Our Team Our Leadership

Yang Li System Architect

Asian American currently living in Pasadena, TX. He has an extensive resume within blockchain and software security industries, including roles at Binance, world's leading crypto and fiat currency exchange platform. This project contains all of his ambitious design choices about system's multi-layer security.

Sergey Storojuk Senior Blockchain Developer

Sergey is Ukrainian, but lives almost 10 last years in Israel; previously worked at Stratis, company that specializes in developing private blockchains for contractors. His excellent skills in blockchain construction are vital when creating a cluster of independently communicating blockchains.

William Clark Product Manager

Asian American of Filipino descent. BCNEX background gives him opportunity to build perfectly managed team and provide best products to market. An entrepreneur with more than 10 years of experience in financial market, William is devoted to idea of the most comfortable and secured crypto storage yet.

Embracing Our Vision of Finances

Since the invention of banking, the global financial system has become increasingly more centralized, meaning that control over most massive financial institutions has been concentrated under very few authorities. Centralization has overall led to the creation of vast amounts of wealth for properly connected ones.

However, the same centralization has also contributed to many challenges and risks we face today, ranging from basic access to growing inequality. Financial sector has compromised itself with only 47% trusting government of global country average. Finally, in a centralized system one abject failure can decimate an entire system, just like a financial crisis in 2008.

An obvious solution for this problem is a modern decentralized system. Blockchain technology has granted a way to reinvent traditional banking and build a better, more efficient system.

Our way of progress is to swiftly integrate the products and partner up with traditional offline systems to expand our impact. We have created the most advanced and secure way to store cryptocurrencies and earn passive income, and we want to revolutionize the system via it!
